INDEX

- 1. AIM:**
- 2. INTRODUCTION:**
- 3. ROLES AND RESPONSIBILITIES**
- 4. EQUIPMENT**
- 5. HAZARDS and SAFETY and RADIATION PROTECTION**
- 6. PROCEDURE / SYSTEMS BY CLINIC AREA**
- 7. QUALITY CONTROL and AUDIT**
- 8. REFERENCES**

1. AIM:

To ensure both clinical areas, public and staff areas including toilets are cleaned on a regular basis and maintain compliance with infection control policy and enabling a safe environment for our service users and staff

To ensure that the policy complies with the need to adhere to the standards outlined in the Health & Social care act 2008 which states:

“Good infection prevention (including cleanliness) is essential to ensure that people who use health and social care services receive safe and effective care. Effective prevention and control of infection must be part of everyday practice and be applied consistently by everyone. Good management and organisational processes are crucial to make sure that high standards of infection prevention (including cleanliness) are developed and maintained”

2. INTRODUCTION

It is important for the safety of patients and staff that the clinic is kept clean, free from contamination and fresh at all times.

3. ROLES & RESPONSIBILITY

It is the responsibility of the senior managers and directors to ensure that policies are in place to enable staff to undertake their cleaning duties with no risk to themselves to ensure the highest standard of hygiene. It is then the responsibility of staff members asked to undertake the cleaning to ensure they follow guidance from the company policies provided.

4. EQUIPMENT

Cleaning products and personal protective equipment available to facilitate the cleaning of the scan rooms is as follows:

- Latex & Powder free Gloves
- Plastic Aprons
- Yellow Rubber Gloves (For domestic cleaning)
- Clinical Waste Bins
- Clinell Universal Wipes
- Clinell Sporidical wipes
- Clinell Universal Spray
- Alcohol Wipes
- Clinell Spill packs
- Tissue/Couch Roll
- Hand Soap
- Antibacterial spray, for kitchen
- Colour coded mops/buckets for different areas of clinic
- Vacuum Cleaner
- Plastic arm guard

N.B. when ‘Clinell wipes’ are documented this refers to the green universal wipes and not sporidical wipes

5. HAZARDS and SAFETY

Appropriate risk assessments have been carried out for all aspects of COSHH when utilising cleaning products and PPE.

6. PROCEDURE / SYSYEMS IN PLACE

Include checklists for all areas cleaned, all to be signed of each day once cleaning completed Staff must be read and understand the product guidelines and risk assessments for all cleaning materials used within the clinic and be aware of what PPE (personal protective equipment) to wear when carrying out cleaning duties for the company

Procedure for cleaning scan rooms

At the end of each day, clinic room/s must be thoroughly cleaned and the daily cleaning checklist completed (As set out below)

| Cleaning Checklist: | Probes & cables | TV probe 3 stage cleaning | Scanner screen & keys | Docks & gel warmer | Bed & frame | Wedge | Computer keyboard & desk | Door handles | Sink & taps | Empty bins | Mop floor | Replenish Stock |
|---------------------|-----------------|---------------------------|-----------------------|--------------------|-------------|-------|--------------------------|--------------|-------------|------------|-----------|-----------------|
| MONDAY | | | | | | | | | | | | |
| TUESDAY | | | | | | | | | | | | |
| WEDNESDAY | | | | | | | | | | | | |
| THURSDAY | | | | | | | | | | | | |
| FRIDAY | | | | | | | | | | | | |
| SATURDAY | | | | | | | | | | | | |
| SUNDAY | | | | | | | | | | | | |

- Prior to cleaning ensure you are wearing the correct PPE.
- Mopping of flooring ensuring all furniture, scanners and bins are moved to enable the floor to be me mopped down thoroughly. Mopped with the yellow mop and yellow bucket.
- The desk and computer monitor must be wiped down using Clinell wipes
 - The computer keyboard must be cleaned by a dry wipe over key board, if required use a slightly damp paper towel dampened by an anti-bacterial spray to clean key board, never use a wet cloth as this will damage the keyboard, phone to be wiped down including the hand set
- The scanner is to be cleaned by;
 - First ensuring scanner is turned off before cleaning
 - Dry wipe over key board, if required use a slightly damp paper towel dampened by an antibacterial spray to clean key board, never use a wet cloth as this will damage the scanner keyboard, ensure the whole scanner is wiped down with Clinell wipes including back of scanner and base, ensuring cables linked to power supply and monitor are free of scanner wheels and hung over the cable hooks.
 - Display surface and monitor of the scanner to be cleaned using anti-bacterial

- spray and wiped dry with a paper towel.
- Probes and cables;
- Use Clinell wipes to clean the probes, wiping upwards from the bottom of the cable to the probe. Never wipe from the probe down as this would be a contamination risk.
- Always unravel any coiled cables and replace on hooks on scanner to ensure all cables are off the floor after cleaning. This is good practice to ensure cables are not damaged during use.
- The couch must be cleaned using Clinell wipes and then left to air dry
- All chairs must be cleaned using Clinell wipes
- The monitor must be cleaned using partially dry paper towel moistened with antibacterial spray
- Cables coming out of the monitor and those running along the floor should always be cleaned using Clinell wipes and left to air dry
- Consumable containers and storage must be cleaned, and stock replenished ready for next day
- Waste bins emptied throughout day if they become full
- Clinical waste bin emptied when it becomes full during scan sessions, at end of day clinical waste bin must be emptied and the bin sprayed and wiped down using antibacterial spray, the bin should be left to dry overnight, at the start of each clinic session or when the bin is replaced a new clinical waste bag should be put into the bin, all clinical waste is to be deposited in the clinical waste bin each time it is emptied and never left to be put out later with other bins

Procedure for cleaning waiting/reception area
